**TANZANIA HEALTH FACILITY ATLAS 2023**

**September, 2024**

## FOREWORD

This Atlas shows a network of services provided in the health facilities in Tanzania, beginning at Dispensary level, Health Centre, District Hospital, Regional Referral Hospital (RRH), Zonal Hospitals, Specialized Hospital up to National level. Additionally, there are specialized clinics, Standalone Laboratories and Diagnostics Services as well as health services provided at community level such as Nursing Home, Maternity Home, Maternity and Nursing Home.

Analysis has been done based at National, Regional and Councils to obtain summary of health facilities registered in the Master Health Facility Registry (HFR) data base owned by the Ministry. This includes disaggregated data on the number and the types of Health facilities, as well as facility ownership. The Atlas is prepared at National, Regional and Council level with each health facility allocated in a specific location, alongside basic layer such as Ocean, Lakes and boundaries, to ensure clear visualization of the distribution of health facilities.

This Health Facility Atlas (HFA) is intended to inform Policymakers, funding partners and stakeholders in the health sector for their appropriate actions, and serves as a guide to healthcare seekers to understand the geographical allocation and availability of health services across the country.

Lastly, the Ministry of Health is expecting that key stakeholders will effectively utilize this Atlas and take appropriate actions to support the government in improving the quality of health care facility. In addition, the Ministry appreciate various comments for improvement of the National Health Facility Atlas.

Dr. John A.K. Jingu  
**Permanent Secretary**

## ACKNOWLEDGEMENT

The National Health Facility Atlas was developed through a highly participatory approach. The Ministry of Health, through the Monitoring and Evaluation (M&E) Unit, led this effort, collaborating with numerous individuals and organizations, each of whom played an essential role. While it is difficult to list every contributor individually, we extend our gratitude to all those who offered their time, technical expertise, financial support, or other forms of assistance, whether directly or indirectly, to make the development of this Atlas possible.

We express our heartfelt thanks to the Department of Curative Services (DCS), Information Technology and Communication (ICT) Unit, and the National Institute for Medical Research (NIMR). Our appreciation also goes to the Regional Medical Officers (RMOs) and Council Health Management Teams (CHMTs) for utilizing their Regional and Council Health Management Information System (R/CHMIS) staff to manage the National Health Facility Registry (HFR) at their respective levels. We acknowledge the contributions of Health Councils and Boards at the ministry level, integral to the HFR.

We are grateful to the Permanent Secretary for approving the publication of this Health Facility Atlas. Our deepest appreciation goes to all funding and implementing partners, whose ongoing support of health interventions and contributions in mapping health facilities made this Health Facility Atlas a reality.

Prof. Tumaini J. Nagu  
**Chief Medical Officer**

## EXECUTIVE SUMMARY

Tanzania has a total number of 11,805 health facilities, comprising 9,366 major facilities which provide comprehensive preventive and curative services (436 Hospitals, 1,126 Health Centres and 7,804 dispensaries). Additionally, there are 936 stand-alone clinics, 1,419 Diagnostic centres, and 84 others such as 9 Supplying and Distribution unit of Optical, 1 Air Ambulance, 8 Blood Transfusion Centre at Zonal Level and 66 Maternity and Nursing Home). Moreover, there are 1,878 facilities currently under construction, comprising 21 Hospitals, 74 Health Centres, and 1,783 Dispensaries.

On the other hand, of the 9,366 facilities 6,988 (74.6%) are public owned by the government, while 1,299 (13.8%) are Privately owned, 998 (10.6%) are owned by Faith-Based Organizations (FBOs), and 81 (1%) are Parastatals. Notably, there is one (1) National Hospital (Muhimbili National Hospital), six (6) government-owned Specialized Services Hospitals, and 15 Zonal Referral Hospitals (6 government, 4 FBOs and 6 Private at Zonal level). Moreover, there are 62 Regional Hospitals (28 government RRH, 16 FBOs and 18 Private at RRH level). Furthermore, there are 351 Council Hospitals (182 are government owned, 5 Parastatal, 101 FBOs and 63 are Private hospital at council level).

The Health Sector operates on a hierarchical referral system from the community to the National level. Each level offers a minimum package of services with efficient referrals from lower levels up to National level. Primary Health Care (PHC) is provided from the Community, Dispensary, Health Centre up to Council Hospitals. The second level consists of Regional Referral Hospitals (RRH), which, among others services, provide the first level of specialized health services. At Zonal level, Specialized services are currently provided and facilitate referrals to National Hospital (Muhimbili National Hospital) or Specialized hospitals such Ocean Road Cancer Institute (ORCI), Muhimbili Orthopaedics Institute (MOI), Jakaya Kikwete Cardiac Institute (JKCI), Mirembe Mental Health Hospital and Kibong'oto Infectious diseases. Muhimbili National Hospital, Ocean Road Cancer Institute (ORCI), Muhimbili Orthopaedics Institute (MOI), Jakaya Kikwete Cardiac Institute (JKCI) serves as dedicated hospitals to provide referral for treatment abroad. Furthermore, there are specialized clinics national wide which address specific diseases such as diabetics, heart diseases, eye care, obstetrics/gynecology and more.

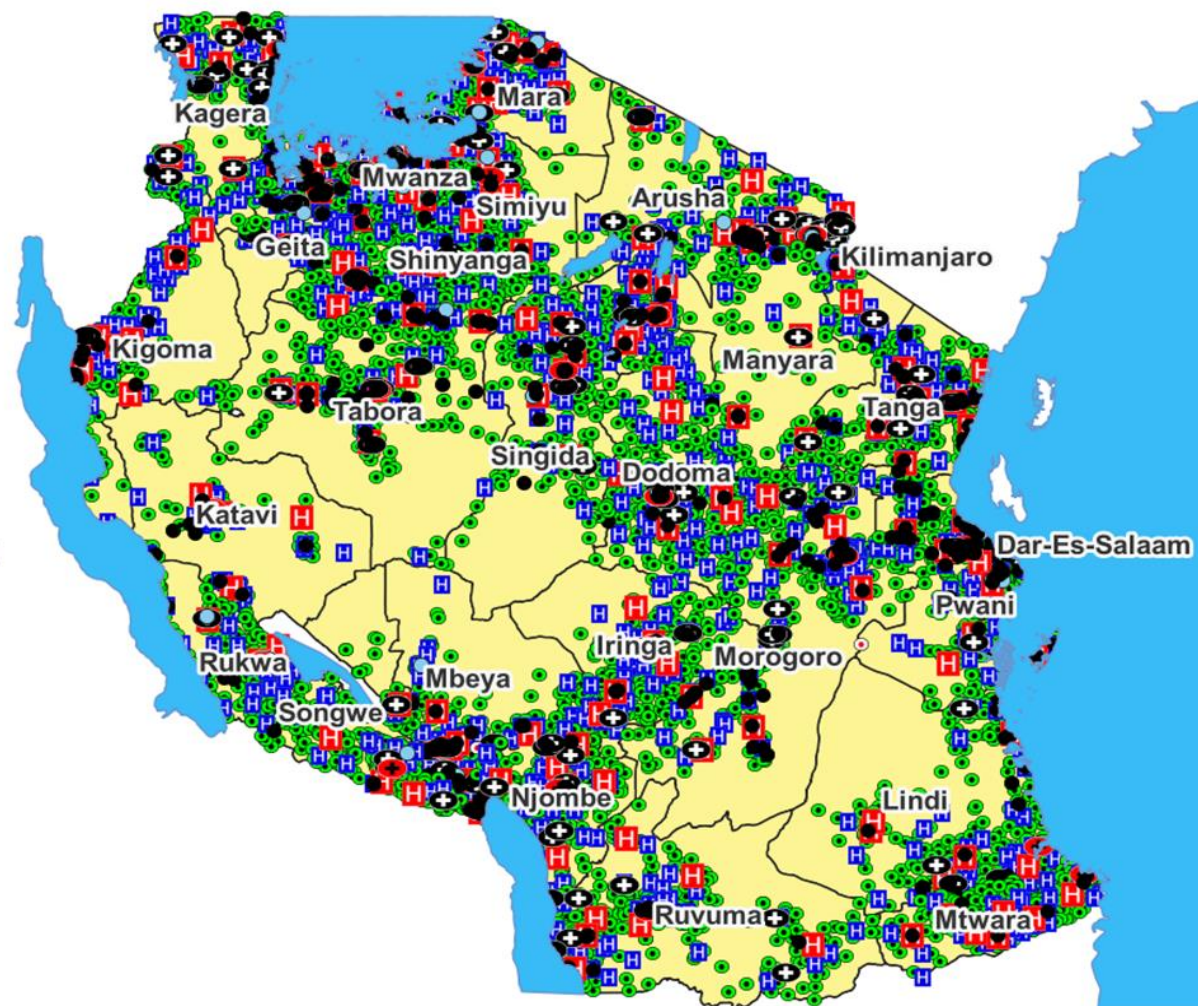

This Health Facility Atlas (HFA) serves as a valuable tool for Policymakers and Decisionmaker in planning. It aims to facilitate Funding and Implementing partners in supporting the government and enables health care seekers to access the geographical availability of health services national wide. Analysis has been done based at National, Regional and Councils levels, providing a summary of health facilities, including disaggregated numbers, types, and ownership, as described in the report.

The map displays the MBEYA region, divided into several districts: Chunya, Mbarali, Mbeya CC, Uvata, MBALIZI, MBEYAL, Mbeya, GOGWE MISSION, RUPIGWETI, KUNUTETE, BUSOKELO, MATEMA LU, ELA, and GENESIS. A legend titled "Facility Type" defines the symbols used: Zonal Referral Hospital (red circle with white cross), Hospital at Regional Level (pink circle with black cross), Regional Referral Hospital (black circle with red cross), Hospital at District Level (black circle with white cross), District Hospital (red square with white cross), Health Center (blue square with white cross), Dispensary (green dot), Clinic/Lab (black dot), and District Boundary (yellow background). A scale bar at the bottom left indicates distances from 0 to 120 KM. A north arrow is located in the top right corner.

The map displays the geographical distribution of health facilities across the Ruvuma District. The district's boundary is highlighted in yellow. Major towns and locations labeled include Madaba, Namtumbo, Tunduru, Kiumma, Mbesa, Songea, Mbinga, Lituli, Ruanda, Malaika, SONGEA DO, MBINGA COUNCIL, TEMBO, ST. ANNES, NYASA, and Nyasa. A legend titled "Facility Type" defines the symbols used: Hospital at Regional Level (pink circle with cross), Regional Referral Hospital (red circle with cross), Hospital at District Level (black circle with cross), District Hospital (red square with white H), Health Center (blue square with white H), Dispensary (green dot), Clinic/Lab (black dot), and District Boundary (yellow area). A scale bar at the bottom indicates distances from 0 to 120 KM.

## **CONCLUSION**

The Health Facility Atlas (HFA) provides a comprehensive overview of Tanzania's health infrastructure, detailing the vast network of facilities across the country. With a total of 9,366 functional health facilities, including hospitals, health centers, dispensaries. Tanzania's health sector demonstrates its commitment to ensure availability and accessibility to healthcare services nationwide. Notably, the majority of these facilities, accounting for 74.6% are publicly owned by the government, underscoring the significant role of public investment in the healthcare system. Additionally, the atlas outlines the diverse ownership landscape, including private, faith-based, and parastatal entities, which collectively contribute to the nation's healthcare delivery.

Furthermore, the HFA serves as a critical resource for policymakers and decision-makers, facilitating informed planning, resource allocation, and collaboration with funding and implementing partners. By mapping the geographical distribution and ownership of health facilities at national, regional, and council levels, the atlas enhances transparency and accessibility in healthcare services. This detailed analysis enables stakeholders to identify gaps, prioritize interventions, and optimize healthcare delivery, ultimately enhancing the overall accessibility and quality of healthcare services for Tanzanians. Moving forward, the Health Facility Atlas stands as a testament to Tanzania's commitment to strengthening its healthcare infrastructure and advancing health outcomes across the nation.
