**TANZANIA HEALTH FACILITY ATLAS 2024**

**September 2025**

## FOREWORD

This Atlas provides an overview of the healthcare delivery system across Tanzania, mapping service delivery points from the primary level (Dispensaries, Health Centers and District hospitals) to tertiary level facilities including Regional Referral Hospitals (RRHs), Zonal and Specialized Hospitals, and ultimately, the National Hospital. It also features specialized clinics, standalone laboratories, diagnostic centers, and community-based care facilities such as nursing and maternity homes

The analysis was conducted at National, Regional and District levels to generate a comprehensive summary of health facilities listed in the Master Health Facility Registry (HFR), managed by the Ministry of Health. It includes detailed data on the number, type, and ownership of facilities. The Atlas is structured by National, Regional and District levels, with each facility precisely geolocated and displayed alongside base map layers such as oceans, lakes and administrative boundaries to enhance the visualization of facility distribution.

The Health Facility Atlas (HFA) is intended to support policymakers, development partners, and health sector stakeholders, while also serving as a resource for healthcare users to better understand the geographic distribution and accessibility of services across the country.

The Ministry of Health welcomes feedback and suggestions, which will play a vital role in informing and improving future editions of the National Health Facility Atlas.

Dkt. Seif A. Shekalaghe  
**Permanent Secretary**

## **ACKNOWLEDGEMENT**

The development of the National Health Facility Atlas was a highly inclusive and collaborative effort. Led by the Ministry of Health through its Monitoring and Evaluation (M&E) Unit, the process actively engaged a diverse range of stakeholders, both individuals and organizations who made meaningful contributions throughout. While it is not possible to acknowledge every contributor by name, I sincerely thank all those who generously dedicated their time, shared technical expertise, offered financial support, or contributed in any way, directly or indirectly, to the successful creation of this Atlas.

I extend my sincere gratitude to the Department of Curative Services (DCS) and the Information and Communication Technology (ICT) Unit for their valuable support. I also wish to acknowledge the Regional Medical Officers (RMOs) and the Council Health Management Teams (CHMTs) for their ongoing efforts in overseeing staff responsible for managing the National Health Facility Registry (HFR) at regional and council levels. Additionally, I recognize the vital contributions of Health Councils and Boards at the ministry level, who continue to play an essential role in the maintenance and governance of the Health Facility Registry.

I would like to express my sincere appreciation to the Permanent Secretary for granting approval for the publication of this Atlas. I also extend my deep gratitude to our funding and implementing partners for their unwavering support to the health sector. Their significant contributions to the mapping of health facilities and the overall development of the Health Facility Atlas have been invaluable.

Dkt. Grace E. Magembe  
**Chief Medical Office**

## EXECUTIVE SUMMARY

As of 2024, Tanzania has a total of 12,846 functional health facilities, an increase from 11,805 in 2023. This includes 10,044 major facilities offering comprehensive preventive and curative services comprising 462 hospitals, 1,254 health centers, and 8,328 dispensaries. In addition, there are 1,013 stand-alone clinics, 1,676 diagnostic centers, and 113 other facilities, such as 13 optical supply and distribution units, 1 ambulance and air service, 8 zonal blood transfusion centers, and 91 maternity and nursing homes

Out of the 10,044 major health facilities, 7,523 (75%) are government-owned, 1,427 (14%) are privately owned, 1,015 (10%) are run by Faith-Based Organizations (FBOs), and 79 (1%) are owned by parastatals. Notably, the country has one National Hospital (Muhimbili National Hospital), along with six government-owned Specialized Service Hospitals and 18 Zonal Referral Hospitals (6 government, 4 FBOs, and 8 private). Additionally, there are 76 Regional Referral Hospitals: 28 government-owned, 21 FBO-run, and 27 private. At the council level, there are 361 hospitals, including 195 government-owned, 5 parastatal, 98 FBOs, and 63 private hospitals.

The health sector in Tanzania functions through a hierarchical referral system, starting at the community level and extending to the national level. Each tier provides a defined package of services, with structured referral mechanisms ensuring efficient patient transfer from lower to higher levels of care.

Primary Health Care (PHC) services are delivered at the community, dispensary, health centre, and council hospital levels. The second tier consists of Regional Referral Hospitals (RRHs), which offer the first level of specialized care.

At the zonal level, super specialized services are available and serve as referral points to the National Hospital or other specialized institutions such as the Ocean Road Cancer Institute (ORCI), Muhimbili Orthopaedic Institute (MOI), Jakaya Kikwete Cardiac Institute (JKCI), Mirembe Mental Hospital, and Kibong'oto Infectious Diseases Hospital.

Muhimbili National Hospital also acts as the primary facility for facilitating referrals abroad for advanced treatment. Additionally, specialized clinics across the country provide targeted care for conditions such as diabetes, cardiovascular diseases, eye care, and obstetric/gynecological services

The Health Facility Atlas (HFA) is a vital resource for policymakers and decision-makers in health sector planning. It also supports funding and implementing partners in aligning their efforts with government priorities. Additionally, the atlas enables healthcare seekers to locate available health services across the country. The analysis is conducted at National, Regional and District levels, providing a detailed summary of health facilities by type, ownership, and distribution, as outlined in this report

NB: Other health facilities = Health Clinics, stand-alone laboratory (diagnostics services), maternity and nursing home etc.

## **CONCLUSION**

The Health Facility Atlas (HFA) offers a comprehensive overview of Tanzania's health infrastructure, highlighting the extensive network of 12,846 health facilities across the country. This network comprising hospitals, health centers, dispensaries, clinics, and specialized service centers, reflects the country's strong commitment to delivering healthcare at all levels. Publicly owned facilities make up 75% of the total, emphasizing the critical role of government investment in the health sector. The atlas also captures the diversity of ownership, showcasing contributions from private entities, faith-based organizations, and parastatal institutions in supporting national healthcare delivery.

The HFA is a vital tool for policymakers and decision-makers, supporting evidence-based planning, effective resource allocation, and strategic collaboration with funding and implementing partners. By mapping the geographical distribution and ownership of health facilities at national, regional, and council levels, the atlas promotes transparency and improves access to healthcare information.

This comprehensive analysis helps stakeholders identify service gaps, set priorities, and enhance the efficiency of healthcare delivery. Ultimately, it contributes to improving both access to and the quality of health services for all Tanzanians. Looking ahead, the HFA reflects Tanzania's strong commitment to strengthening its health system and advancing national health outcomes.
